Phir Milenge

A doc editor for places with no signal.

“We’ll meet again.” It’s painted on the backs of Indian trucks.

BIOS 2026 · FRONTIER track · Problem 09

Relief happens where the signal isn't

9,226 people

were paid house grants twice after Cyclone Amphan: 18 crore rupees. Every camp's list was fine on its own.

About 10,000

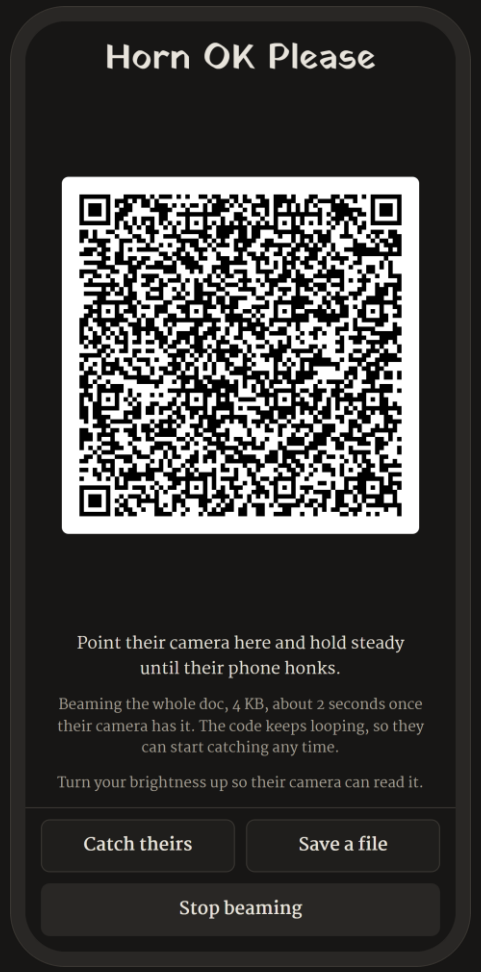

Indian villages have no mobile signal at all.

Phones swap the doc when they meet

One phone shows a moving code. The other's camera catches it.

No internet, no Wi-Fi, no Bluetooth. A file on a pen drive works too.

Beam

Catch

Meet in any order. End on the same doc.

Rina → Asif → Tanmoy

Tanmoy → Rina → Asif

Asif → Tanmoy → Rina

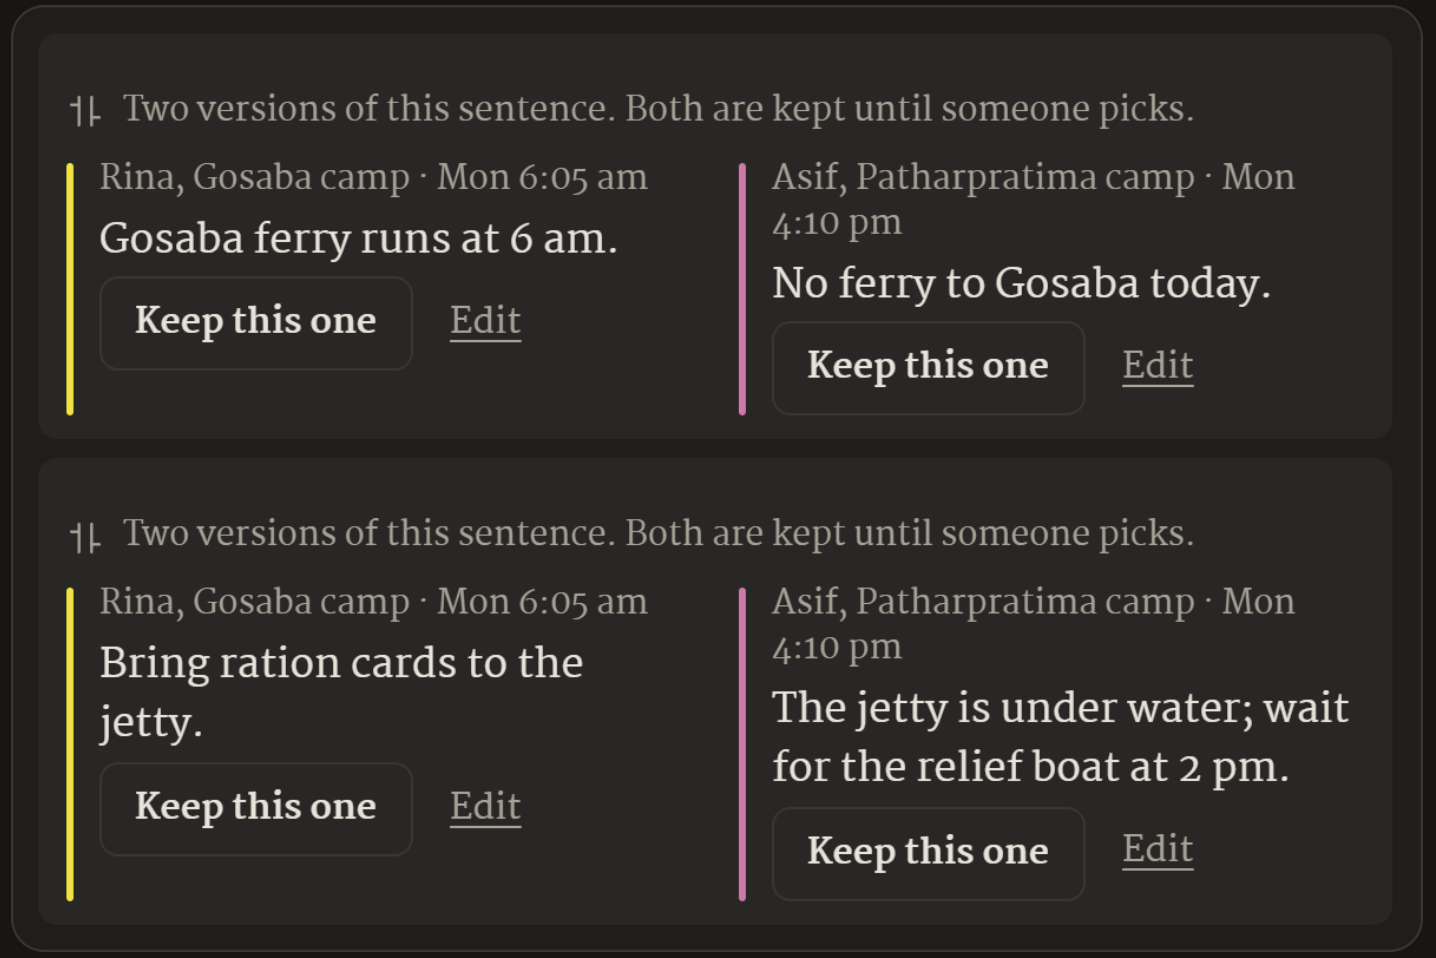

Three camps, three orders

Bird Autumn Bamboo

Same truck back on every phone means the same doc.

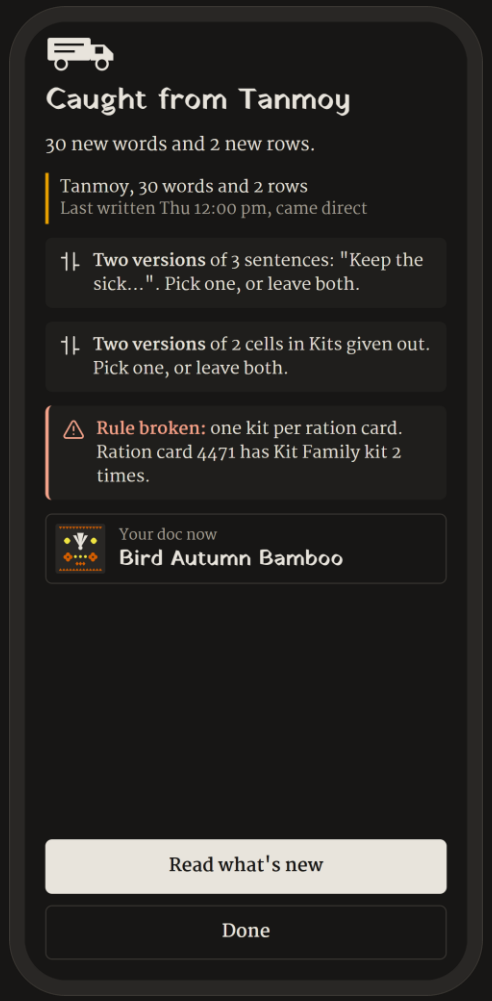

Both versions are kept

Rina and Asif changed the same sentence without seeing each other's change.

A normal sync keeps whichever arrived last, and families walk to a flooded jetty.

The Amphan mistake, caught

Rules written inside the doc, like one kit per ration card, are checked the same way on every phone, whatever order they synced in.

Ration card 4471: a kit at Gosaba on Monday, another at Basanti on Tuesday.

4471	Family kit	Gosaba	Mon
4471	Family kit	Basanti	Tue

Shuffled a thousand times. Same doc.

Bird Autumn Bamboo 66

1,000 of 1,000 the same

1,000 shuffled orders, all the same truck back. Each time every change was rebuilt, clashes, picks and rules included.

And a 20,000-change doc opens in about 0.2 seconds on this laptop.

We're starting with relief camps
